

Course: IT202-010-S2025

Assignment: IT202 Module 1 Checkpoint

Student: Justin C. (jjc88)

Status: Submitted | Worksheet Progress: 100.00%

Potential Grade: 10.00/10.00 (100.00%)

Received Grade: 0.00/10.00 (0.00%)

Grading Link: <https://learn.ethereallab.app/assignment/v3/IT202-010-S2025/it202-module-1-checkpoint/grading/jjc88>

Instructions

1. Ensure you've followed the lessons to set up your Github, git, and VS Code
2. Fill in the below tasks (note it'll save as you go)
3. Once everything is filled in, ensure you click "Submit and Export PDF"
4. Upload the PDF to Github in a Module1 folder
5. Find the downloaded PDF and move it into the location of your local repository folder (don't use the Github upload option as we want to practice the git commands)
6. Use `git add .` to track all file changes (i.e., the PDF)
7. Use `git commit -m "Uploading M1 PDF"` to record the change and provide a meaningful message
8. Use `git push origin main` to move the changes to the remote repository's main branch (Note: Future assignments will have a dedicated branch name for their work)
9. Take the same PDF and upload it to the Canvas submission

Section #1: (10 pts.) Tasks

Task #1 (0.00 / 2.22 pts.) - Screenshot of VS Code Extensions for t

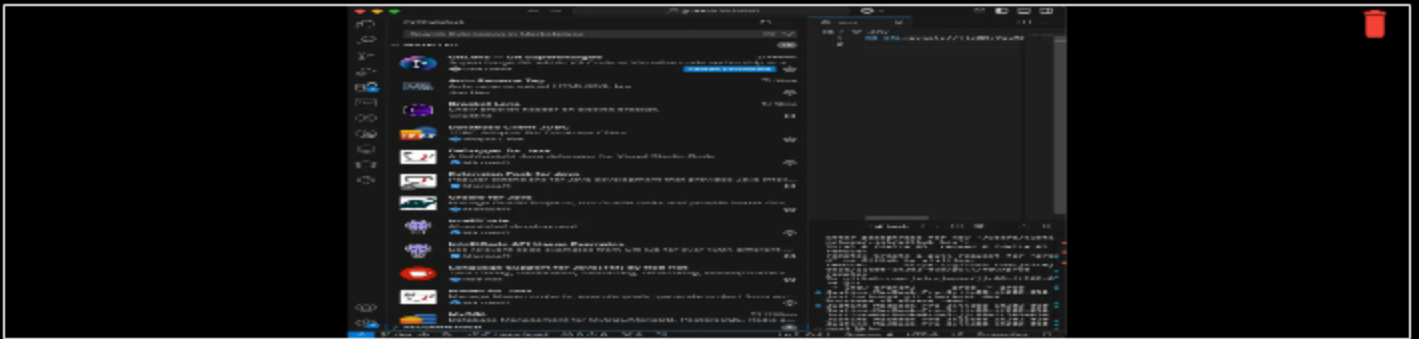

Weight: 22.22%

Objective: *Screenshot of VS Code Extensions for this class*

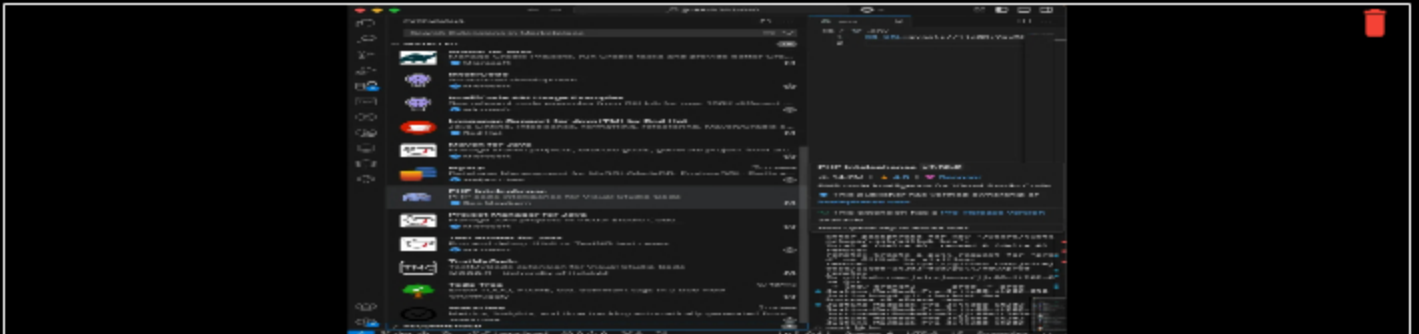

Details:

- Ensure you have the following extensions
 - PHP Intelephense
 - WakaTime
 - Git Lens
 - MySQL Extension

Image Prompt

Extension screenshot 1/2

Task #5 (0.00 / 2.22 pts.) - Reflection

Weight: 22.22%

Objective: Reflection

Details:

- Did you have any issues/problems this module? If so, what were they and how did you solve them?
- Did you learn anything new this module? If so, provide some brief details.
- If both answers were no, briefly explain your prior background.

Text Prompt

Your Response:

I did not have any problems following along with the setup. Although confusing I was able to follow. Taking part in the module I learned how to setup VS and with their extensions, also learning terminal commands and github usage. I have a good idea of what is happening when certain commands are used and their purpose, but being new to this I am slowly coming to a understanding of what is truly going on behind the code.
